

# Transfer von Daten aus dem Liquidity Planner in das One Exposure from Operations

Beitrag von „Claus Wild“ vom 12. Februar 2018, 17:23

Über die Transaktion FQM\_TRANSFER werden Daten aus dem Remote-System in das One Exposure from Operations transferiert.

The screenshot shows the SAP FQM\_TRANSFER transaction configuration interface. At the top, there is a blue header bar with the SAP logo on the left and the text "Initialer und periodischer Upload in One Exposure from Operations Hub" on the right. Below the header, there is a light blue section containing a dropdown menu on the left and the text "Als Variante sichern..." and "Mehr" with a downward arrow on the right. The main configuration area is white and contains the following fields and checkboxes:

- "Logischer Port:" followed by a text box containing "LP\_FQM\_WS\_DISTRIBUTE".
- "Testlauf:" followed by a checked checkbox.
- "BuKrs-Selektion überspringen:" followed by an unchecked checkbox.
- A section header "Meldungsprotokollierung" followed by a horizontal line.
- "Protokoll anzeigen:" followed by a checked checkbox.
- "Persistentes Protokoll:" followed by an unchecked checkbox.
