

# Konfiguration von SAP Cash Application

Beitrag von „Claus Wild“ vom 21. November 2020, 10:32

Mit Hilfe des Report ML\_CASH\_APP\_CONFIG\_V7 kann SAP Cash Application ohne WebDynpro konfiguriert werden.

The screenshot displays the SAP configuration interface for the program ML\_CASH\_APP\_CONFIG\_DP. The header bar includes the SAP logo and the program name. Below the header, there is a navigation bar with a dropdown menu, the text 'Als Variante sichern...', and a 'Mehr' dropdown. The main configuration area contains six rows, each with a label and a text input field:

- Training Data Destination:
- Training Trigger Destination:
- Training Status Destination:
- Open Items Destination:
- Inference Job Destination:
- Inference Results Destination:
